

# Imobi Liberty Ugochukwu

Highly motivated and results-driven Java Developer with 2 years of experience creating innovative solutions for various industries. My proficiency in Java frameworks such as Spring boot and Hibernate allows me to design and develop efficient, scalable, and reliable applications. I am well-versed in software development methodologies such as Agile, Scrum, and Waterfall, and possess excellent problem-solving and debugging skills.

## EXPERIENCE

### Decagon, Lagos - *Software Engineer*

APRIL 2022 - Date

- Collaborate with various teams to design, develop and implement software applications for websites based on analyzed requirements and understanding of industry technical standards.
- Developed web solutions with Java and Spring Boot, streamlining clients' web development processes and increasing their productivity.
- Designed and maintained databases, ensuring the smooth operation of clients' web-based systems.
- Innovated new solutions and responded to change, providing clients with cutting-edge solutions to meet their evolving needs.
- Wrote SQL queries and mapped entities to databases using JPA.
- Implemented microservices and RESTful APIs for integration with 3rd parties.
- Demonstrated a flexible and collaborative work approach, adapting to changing situations and contributing to a positive work environment.
- Utilized Jira or other SCRUM-based systems, streamlining clients' project management processes and increasing their efficiency.
- Configured CI/CD pipelines with tools such as Jenkins, Docker, CircleCI, and Kubernetes for continuous integrations and deployments of projects.

### Brain Technology, Port Harcourt - *Backend developer Java*

JUNE 2021 - FEBRUARY 2022

- developing software solutions that interact with third-party APIs to deliver innovative and practical solutions to the business.

Apapa, Lagos Nigeria.

## TECHNOLOGIES

- Java
- Spring Boot
- Spring Security
- IntelliJ IDEA
- Docker
- CI/CD
- Hibernate
- Spring MVC
- ReactJs
- Git
- PostgreSQL
- SQL
- MySQL
- Heroku
- AWS
- Postman
- Swagger
- Jira
- Maven
- Thymeleaf
- JavaServer Pages (JSP)
- HTML 5
- CSS 3
- Javascript

## SKILLS

- Strong communication
- Attention to details
- Innovative
- Creative
- Test-Driven

- Implemented microservices and RESTful APIs for integration with 3rd parties.
- Demonstrated a flexible and collaborative work approach, adapting to changing situations and contributing to a positive work environment.
- Responsible for refactoring code bases to meet client demands and ensure more efficient space and time complexity.
- Built, and analyzed systems flow, data usage, and work processes, and investigated problem areas.
- Teamed with Project manager, developers, quality assurance, and customers to resolve technical issues and enhance productivity.

- Development
- Testing and debugging
- Proactive
- Agile Methodology

## Prosoft Technology Solution , Port Harcourt - *Web developer*

November 2019 - February 2021

- Implemented e-commerce solutions for various clients, enhancing their online presence and increasing their revenue.
- Implemented front-end systems such as HTML5, JavaScript, and CSS, providing clients with visually appealing and user-friendly websites.
- Troubleshoot and solve complex technical issues independently, providing clients with timely solutions to their problems.
- Demonstrated proficiency in Git/GitHub, ensuring smooth collaboration among developer teams.
- Worked collaboratively with clients and other employees, providing excellent customer service and contributing to a positive work environment.
- Possessed excellent verbal and written communication skills, ensuring clear and effective communication with clients and team members.

## PROJECTS

### EasyTransaction

A fintech application that enables users of the application to pay utility bills, make transfers within the application or transfer money either to their local bank account or any other bank of their choice. The application uses a wallet system. Users can optionally make a wallet-to-wallet transfer. External APIs were consumed and integrated

with the application.

Technologies Used - Spring boot, Spring Security, JWT, Postgres, Docker, CI/CD, Swagger, JUnit, Git Action (CI/CD), and mockito.

GithubLink: <https://github.com/engineerLiberty/EasyTransaction>

## **FoodMart**

The product “FoodMart” is a single vendor e-commerce website where in this case the vendor is a restaurant owner whose major product is fast food and known for their signature burger, side dishes, and drinks.

Users of this application will be able to browse through the application to find desired burgers and then add them to a cart, after which they will proceed to checkout and make payment through an external payment service.

Technologies Used - Spring boot, Spring Security, JWT, Postgres, postman, JUnit, Git Action (CI/CD), and mockito.

## **Naijagigs4me**

Naijagigs4me is an e-commerce platform where artisans from different works of life can upload their profile in order to be hired by clients that need their services

Technologies Used - Spring boot, Spring Security, JWT, Swagger, JUnit, Git Action (CI/CD), and mockito.

## **Digital Wallet Microservice with Payment Integration (Paystack API):**

A digital wallet microservice with payment integration for funding and withdrawals. Secured with JWT and Spring Security, documented with Swagger, and automated with GitHub actions and docker file for CI/CD.

## **E-commerce Projects:**

- NeutriHerbs: A Shopify beauty store. <https://neutriherbs.ng/>
- Rainbow Hairs: Women's hair brand. <https://rainbowhairs.com.ng/>

## **ActivityTracker\_API**

Activity Tracking System is an application that helps students with poor time management keep track of their planned activities.

Technologies Used: Spring Boot, Java, Postgres, Postman, Git Action (CI/CD). GithubLink: [Activity Tracker](#)

## **Fashion\_Blog\_API**

An api that lets multiple bloggers post content and get responses from their readers, in the form of likes and comments.

Technologies Used:

Spring Boot, Java, Postgresql, Postman, Github Link: [FashionBlog](#)

## **EDUCATION**

Rivers State University, Port Harcourt

August 2017

## **Marine Engineering**

## **CERTIFICATION AND AWARDS**

- Scrum Fundamentals Certified (ScrumStudy Accreditation).
- Spring Boot Fundamentals (Certified).
- Java for Programmers (Certified)
- Java 8 for Experience Developers: Lambdas Stream API and Beyond (certified).
- Basics of JavaScript Programming (Certified).
- EF Standard English Test (Certified).
